Thabiso Kenneth Mokone

I thrive on the relentless pursuit of innovative solutions to real-world challenges, driven by a passion for crafting sustainable and impactful software. Guided by the spirit of Ubuntu—where inclusivity, collaboration, and shared values shape every decision—I strive to create technology that uplifts both people and communities. With every project, my goal is not only to solve problems today but also to build adaptable, future-ready solutions that stand the test of time.

▬▬ WORK EXPERIENCE

Thuleka Lodge, Johannesburg

Night Duty Manager   JANUARY 2020 - JANUARY 2021

- Led front office operations to ensure a professional, safe, and welcoming lodge environment.
- Delivered exceptional guest service by managing arrivals, registrations, and departures with precision.
- Facilitated smooth check-outs and billing procedures with accuracy and efficiency.
- Maintained strict adherence to Standard Operating Procedures, ensuring consistency and reliability.
- Cultivated guest satisfaction through a proactive, organized, and service-driven approach.

Scrums (formerly SovTech), Johannesburg

Junior Software Engineer   FEBRUARY 2022 – FEBRUARY 2024

- I contributed to building resilient and impactful software solutions for diverse clients by:
- Developing and maintaining foundational code to ensure application integrity.
- Debugging and implementing enhancements to improve performance and user experience.
- Collaborating closely with senior developers to refine processes and deliver scalable solutions.
- Engaging with user groups to align software features with real-world needs. This role strengthened my expertise across the software development lifecycle and nurtured a mindset of continuous improvement.

▬▬ EDUCATION

Frontline Hospitality Traning College

City and Guilds Diploma in Reception Service   JANUARY 2018 — DECEMBER 2019

- Completed a professional diploma focused on front office and customer-facing operations within the hospitality sector. The qualification covered:
- Reception and guest service skills
- Workplace safety and professional conduct
- Customer service in hospitality and catering
- Booking systems, accommodation management, and guest accounts
- Cash handling and billing procedures
- Guest arrivals and departures
- Promoting products and services

HyperionDev

Software Engineering bootcamp certificate   JULY 2021 — OCTOBER 2022

- I completed an intensive 3-month Software Engineering Bootcamp that transformed my skills from beginner to junior developer. The curriculum covered Python, Object-Oriented Programming, and machine learning, enabling me to build real-world applications and strengthen my portfolio with industry-ready projects. Through direct mentor feedback and peer collaboration, I developed strong problem-solving, coding, and communication skills while fostering a growth mindset.

PROJECT

Portfoilo   Winter 2025

- This is my personal portfolio website — https://portfolio-ten-vert-28.vercel.app/ — — built with Next.js 15, TypeScript, and Tailwind CSS. It showcases my skills, projects, and experience with a focus on performance, accessibility, and modern UI. Featuring Radix UI, Framer Motion animations, and Resend-powered email integration, this site reflects my ability to build forward-thinking, impactful web experiences.

SKILLS

TypeScript ●●●●●   Chakra UI ●●●○○   Node.js ●●●●●
Tailwind CSS ●●●●●   SQL ●●●○○   AWS ●●●●○

- Technical Skills:
- Frontend Development: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vue.js
- Backend Development: Node.js, Express.js, Laravel, MySQL, MongoDB
- Version Control & Collaboration: Git, GitHub, GitLab
- Testing & Debugging: Jest, Chrome DevTools, Postman
- Data & APIs: RESTful APIs, JSON, CRUD operations, TanStack Query
- Deployment & Cloud: AWS (basic), Vercel, Netlify
- Soft Skills:
- Problem-Solving & Critical Thinking
- Collaboration & Teamwork (mentorship & peer coding exposure)
- Adaptability & Continuous Learning
- Strong Communication (technical & non-technical stakeholders)
- Time Management & Organizational Skills
- Professional Competencies:
- Agile & Scrum methodologies
- Writing clean, maintainable, and scalable code
- User-focused design thinking
- Software lifecycle enhancement & bug resolution
